SOFTWARE ENGINEER

Full-stack software engineer interested in developing creative and user-friendly software products. I have diverse experience that covers: team leadership, operations management, and sales. Through effective communication and organization, I have successfully led multiple teams ranging from 4 to 30 soldiers, through complex military training exercises. In surgical operating rooms, I provided technical assistance to surgeons with the size and function of different spine orthopedic implant systems for various procedure types and approaches. I am eager to further my software engineering knowledge and contribute to a team.

TECHNICAL SKILLS

JavaScript, React, CSS, Ruby, Rails, git

TECHNICAL PROJECTS

Goose Wallet - [Github](#) | [Demo](#)

Fan resource equipped with setlists, album information, reviews, recent performance footage, and lyrics. Enables users to track their favorite concerts, live songs, attended shows, and reviews. The administrator has the power to create new albums/concerts, associate respective songs, and remove any review.

- Developed JavaScript/React/Tailwind CSS/Daisy UI front-end
- Modeled custom database schema and REST API with Active Record, PostgreSQL, and Ruby on Rails
- Authenticated users at login by encrypting identifying account information via JSON Web Token

EXPERIENCE

Camfil USA

Territory Sales Manager

Denver, CO

06/2022 -07/2022
